Notes

¹Production specifications shown are for beginning of life performance, end of life operating current (lop) is 120% beginning of life lop

²Current phase within nLIGHT's NPI (New Production Introduction) process

³Export Control Classification Number (ECCN) as defined by the Export Administration Regulations (EAR)

⁴Thermal resistance is the diode junction temperature shift per incremental Watt of heat load

⁵The wavelength temperature coefficient is the wavelength shift per °C change at the diode junction

⁶Operating temperature defined by the package housing. Acceptable operating range is 20 - 35C, but performance may vary ⁷Does not include mass of fiber
