Notes

- ¹ Production specification shown are for beginning of life performance, end of life operating current (top) is 120% beginning of life top
- ² A non-condensing environment is required for operation and storage. Storage conditions are from -20 to +70 °C with relative humidity between 5 to 85 %
- ³ Operating temperature defined by the package housing
- ⁴ Current phase within the nLIGHT's NPI (New Production Introduction) Process
- ⁵ Export Control Classification Number (ECCN) as defined by the Export Administration Regulations (EAR)
- ⁶ Reported power is with an uncoated distal fiber end, therefore will be ~ 3.5 % higher if spliced
